

# « The Forgotten Legend »

Perfumed « concert show » by Nathalie MANSER

A musical and olfactory concert

This show combining music, the projection of images and scents innovates and surprises through the impact of its original music, the captivating magic of the scents accompanying the sound, the poetic and fantasy pictures.

Performed on stage by Nathalie MANSER with her cello and José MARTIN in charge of the olfactory diffusion.

Josephine WALL

# Scent diffusion by José MARTIN (SIGMACOM) and design of fantasy images by Cyril ROLANDO, Josephine WALL and SYLAR113

Inspired by « World Music » by the virtuoso cellist Nathalie MANSER (original music by Nathalie MANSER, Georges DE ANGELIS and David RICHARDS, famous sound engineer for Queen and David Bowie), this show leads us on a voyage to the heart of the cradle of humanity, full of colours and scents.

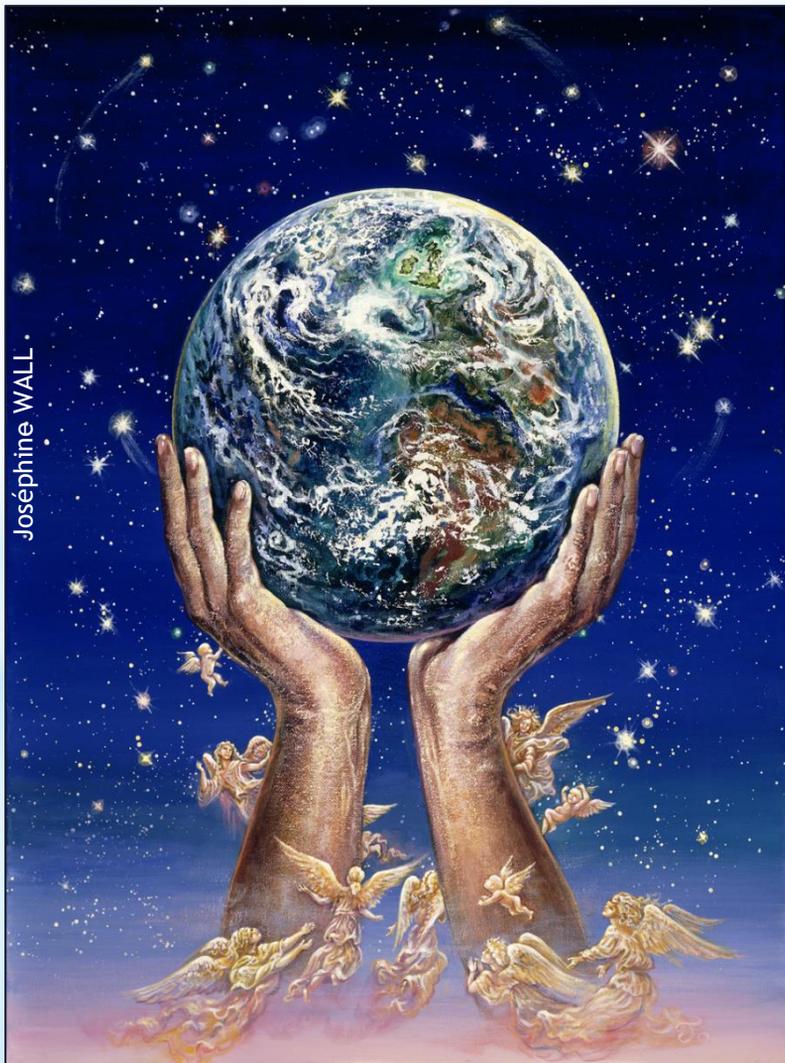

A voyage in a world of legends. At the heart of ancestral wisdom and in a humanistic approach, Nathalie MANSER calls on artists such as Cyril ROLANDO, Josephine WALL and SYLAR113 for the design of fantasy and surreal images, and José MARTIN for the scent diffusion system.

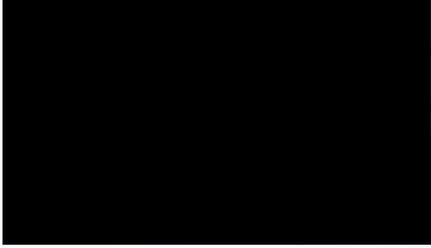

## Synopsis of the show

*The Forgotten Legend is about the human quest, told in the form of a poetic magic which awakens our hearing, olfactory and visual senses. It is the story of the coming of the human being to Earth, from the cosmos, his conception and his human journey seen from a metaphoric and fantasy stand point. The human ancestral values are mentioned in the form of several scenes until the return of the human being in the cosmos. It is a little like the story of «The Little Prince» ... the human being goes to visit the planets of values. – Nathalie MANSER*

For adults, it is a humanistic approach bringing a universal message of peace and hope to the present-day world. For children, it represents a precious and educational message to transmit, in order to teach them to cultivate good and beautiful values and to fulfil their own potential and existential future.

# NATHALIE MANSER

This virtuoso cello player was brought up right from her early childhood in the world of classical music. After having obtained a "1er Prix de Virtuosit  with the Jury's congratulations and the highest diploma of the State Musical Academy of Lausanne, the "Concert Licence", she had the opportunity to play with several orchestras in the French-speaking part of Switzerland and has continued her musical education by following Master Classes in Germany.

NEVERTHELESS,

the rigidity of classical music could hardly offer her any room for personal creation or interpretation. For this reason, NATHALIE MANSER moved away from classical music in order to create her own musical compositions and adaptations with the cello.

THANKS

to her knowledge and mastery of the instrument, she has been able to produce her own personal and sensual music derived from "World Music" and "Meditative" trends.

Her magical encounter with DAVID RICHARDS, the famous and talented sound engineer/producer, artistic director of the MOUNTAIN STUDIOS in Montreux. (where Queen, Freddie Mercury, Michael Jackson, David Bowie and others have recorded their productions), has given Nathalie MANSER the opportunity to affirm her creativity and to develop a number of musical pieces, rich in emotion and poetry.

## FOLLOWING HER GREAT SUCCESS

with her first show « Un Monde en Senteurs » (« World Scents »), Nathalie MANSER presents her new creation. Surrounded by poetic magic, which will awaken your visual, olfactory and also your hearing senses, you will be transported into a world of legends, at the heart of ancestral wisdom, in this mythical universe that is the cradle of humanity.

# JOSE MARTIN

Founded on 1st January 1988, the company SIGMACOM  
diffuses scents indoors as well as outdoors.

Patented by José MARTIN, scent diffusers allow the full restitution of the olfactory properties, fungicides or sanitizing of the products used. The processing of the products from liquid form to the state of microparticles is performed by a simple mechanical process without changing temperature or adding propellant or any other product.

Scent diffusers can perfume vast stage areas, even outdoors. It takes a few seconds for a perfect diffusion of fragrances in the desired volume, while consuming...1 to 3 cl of product per hour of continuous operation.

The SIGMACOM method enables several scents to be diffused, one after the other, in a separate and instantaneous manner. There are over 2 500 olfactory references in the catalogue with the possibility of creating specific fragrances.

**SIGMACOM has already made a name for itself in North America, EUROPE, in Russia, in Japan, in Africa, the Middle East, and Australia for prestigious shows and benefits.**
